THAT DELIVERS LONG-

## WHAT IS FLEXIBLE LEARNING?

---

Flexible learning qualifications are developed to help learners gain knowledge and skills required to carry out a variety of job roles.

As they have been designed around a flexible learning delivery model, they are an excellent way of learning quickly and efficiently. They are easily accessible within the workplace, meaning learners do not attend a classroom but still receive high-quality support throughout their learning journey.

Courses are often available fully funded and are all nationally accredited.
